

Georgios Antoniadis

JUNIOR SOFTWARE ENGINEER

Profile

As a skilled junior developer and postgraduate student specializing in "Advanced Software Development Technologies" in the department of Computer Science of UoP, I am passionate about designing and implementing innovative software projects that push the boundaries of technological progress.

My particular interests lie in exploring both established and emerging techniques for building web – full stack applications, and I am committed to continuously improve my skills and knowledge through ongoing learning and development opportunities.

I have experience working collaboratively on software projects with my fellow students and am proficient in several programming languages and tools. In my first steps, I have focused on programming based on good practices and design patterns, and I am excited to continue building on these foundations as I advance in my career.
